## RESUME

I am a Fullstack Developer with over 4 years of experience in agile environments, developing and implementing web applications, with a strong background using React, Node.js, PHP, AWS and other technologies.

## ACADEMIC BACKGROUND

Unicesumar - **Systems Analysis and Development Technology**

4º semester - Conclusion in: 06/2024

ETEC - **Systems Development Technician** - June 2019 - Dez 2020

## LANGUAGES

English (writing - intermediate; conversation - intermediate; reading - advanced)

Portuguese - Native (Fluent)

## EXPERIENCES

**Uhuu!** - Fullstack Developer - July/2023 - now

As a fullstack developer at Uhuu!, I was responsible for developing and maintaining the company's website and internal systems. I collaborate with the design team to create a user-friendly interface and ensure the responsiveness of the site. I optimize system performance for thousands of users and implement new features to improve the user experience. In addition, I provide on-call support for applications in production, develop SQL queries for data extraction and participate in daily meetings with the technical team.

**Albert Einstein (ACT Digital)** - Full Stack Developer - march/2022 - may/2023

As a Fullstack Developer at Albert Einstein, I was responsible for developing and maintaining dashboards using React, Typescript, and Styled Components. I develop and maintain APIs with Node.js, Typescript, NestJs, and SQL, and document these APIs with Swagger. I use Docker for local development and deploy applications on AWS both manually and through CI/CD pipelines. Additionally, I ensure code quality through automated testing with Jest and Supertest, and follow a Scrum-based development process to manage tasks and deliverables.

**Bizsys** - Full Stack Developer - april/2021 - february/2022

As a Fullstack Developer at Bizsys, I was responsible for developing on-demand applications using React, Next.js, Styled Components, and Unity. I deploy these applications on AWS, ensuring they are accessible and performant for users.

**RecodePro** - Programming Monitor - december/2020 - mach/2021

As a Programming Monitor, I tutor students three times a week, and teach programming classes focusing on React, Node.js, and JavaScript twice a week. I am responsible for correcting projects, preparing activities, and making decisions with the team to enhance the learning experience.
